Summary

Founding/Full-Stack Engineer shipping AI-enabled products end-to-end: backend systems, agent workflows, web data pipelines, and cloud delivery. Strong in TypeScript, React/Next.js, Node.js, PostgreSQL, and AWS; proven track record shipping MVPs fast, improving performance, and owning infrastructure.

Education

Rajiv Gandhi Institute of Petroleum Technology (RGIPT) **Nov 2022 – Jun 2026**
B.Tech, Information Technology *Jais, Uttar Pradesh*

Experience

Elara — AI Personal Styling Platform **Dec 2025 – Present**
Backend Engineer
- **Owned backend + AI pipeline:** Built agent workflows, scraping architecture, and personalization logic for a high-ambiguity AI product.
- **Benchmarking + custom extraction:** Evaluated paid/open-source scraping tools; built brand-specific scrapers when off-the-shelf solutions failed requirements.
- **Rapid Iteration:** Delivered MVP in **5 weeks**; onboarded **350+ users in 2 days** and rapidly improved trust, latency, and personalization based on user feedback.

Hireanything.com **Sep 2024 – Dec 2025**
Team Lead, Full-Stack Developer (Remote) *UK*
- **Engineering leadership:** Introduced clean-code practices, automated testing, and team workflows, reducing release cycle time by **60%**.
- **Full-stack delivery on AWS:** Architected and maintained production MERN services with operational ownership (monitoring, reliability, deployments).
- **CI/CD + deployments:** Implemented repeatable build/release pipelines using Docker and Kubernetes patterns to reduce risk and downtime.

ASSSR (NITI Aayog) **Jan 2025 – May 2025**
Full-Stack Developer Intern *New Delhi, India*
- **Product engineering:** Shipped web features using **Next.js**, **React**, and **TypeScript** with strong code-quality practices.
- **Backend performance:** Implemented REST APIs and SSR services in **Node.js**, reducing initial server response time by **30%**.
- **Delivery automation:** Set up CI/CD via GitHub Actions and supported AWS deployments for consistent release processes.

i2V Systems Pvt. Ltd. **Jun 2024 – Jul 2024**
Software Development Engineer Intern *Gurugram, India*
- **Architecture + data modeling:** Improved system design and database schemas, delivering a **30%** performance increase.
- **UI modernization:** Built responsive components that increased user engagement by **20%**.
- **Performance tuning:** Optimized production code across **C#**, **WPF**, and **Java**, improving runtime performance by **15%**.

Projects

ClipShare — Universal Clipboard (E2E Encrypted) Repo | Link
- **Cross-device sync:** Built bi-directional clipboard sharing between **Android (Kotlin)** and **macOS (Swift)** for seamless copy/paste across devices.
- **Zero-knowledge security:** Implemented end-to-end encryption using **XChaCha20-Poly1305** with authenticated pairing via **QR-based key exchange**.
- **Real-time & Robust:** Engineered a **Go WebSocket relay** (¡400ms latency) and optimized Android foreground services/secure storage (Keystore) for battery-efficient sync.

AI Code Analyzer Repo | Link
- **Automated reviews:** Analyzed repositories with AI-assisted workflows to reduce manual review effort by **70%**.
- **GitHub integration:** Implemented OAuth + GitHub APIs to discover/sync **100+ repositories**.
- **Performance:** Optimized data flow and caching to keep typical API responses under **300ms**.

Collab Note (Realtime) Repo | Link
- **Real-time collaboration:** Enabled concurrent editing with conflict-minimizing synchronization patterns.
- **Low-latency:** Achieved sub-**100ms** collaboration latency using Next.js + Node/Express.
- **Scale:** Designed MongoDB change streams + WebSocket flows to support **50+ concurrent users**.

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, SQL, Go, Java, Kotlin, Swift
Frontend: React, Next.js, Redux, Angular, Tailwind CSS, Three.js
Backend: Node.js, Express, REST APIs, GraphQL, WebSockets, JWT, OAuth
Infrastructure & AI: AWS (EC2, S3, Lambda), Docker, K8s, PostgreSQL, MongoDB, Redis, LangChain, Agents
